## Template Cover Page Explanation

***Due to the wire binding of our journals our covers will shift .125" to accommodate this please refer to these artwork guidelines.***

Our journal page is 6.875" wide X 8.875" high. Paper color is shown to match our ivory paper stock for reference.

If you want a picture or text to appear in the window when the journal is closed, keep the content in the GREEN box. Anything outside of this green area has risk of being cut off or will not show up in the die cut windows.

If you want the text or image to extend beyond the window, make sure it extends to the red dotted line box or beyond it.

The pink line indicates where the live print area is located. Fill it up! Add anything you would like to the page. Just remember not to extend past this live print area or your text/image will not print. If you want full page printing with bleeds, make sure to talk to contact us first.

Don't feel limited by this template. If you need help, just call us at 800-897-8528 or 989-686-3377.
